Overtime Report

Powerful Cloud-Based Time and Attendance Management Platform

ZKBio Time Cloud is a powerful cloud-based time and attendance management platform that provides a stable connection to ZKTeco's standalone push communication devices via Ethernet, Wi-Fi, GPRS, 3G, and LTE, and works as a cloud to offer employee self-service through mobile applications and web browsers. Multiple administrators can access ZKBio Time Cloud from anywhere with an internet connection. It can easily handle thousands of devices and tens of thousands of employees and their transactions.

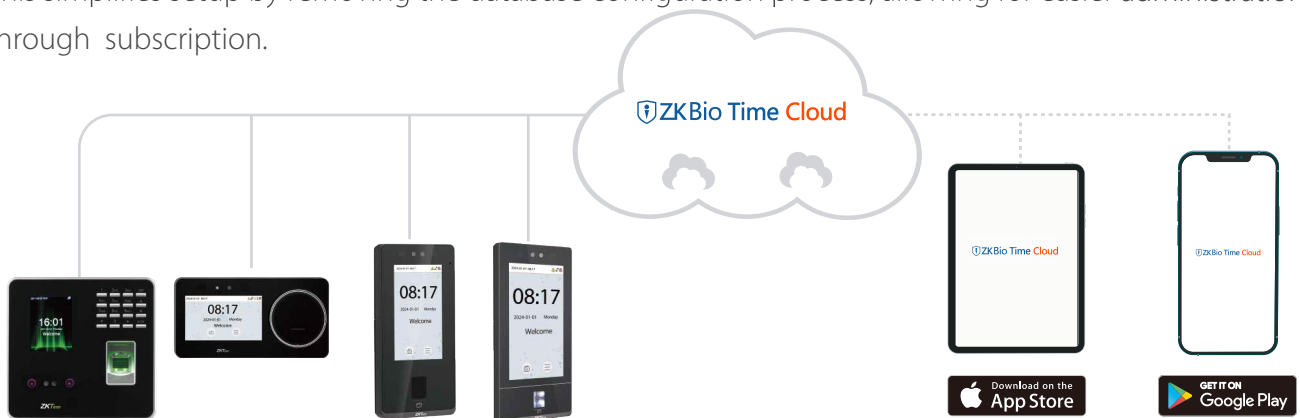

Why choose ZKBio Time Cloud ?

As a fully cloud-based platform hosted on Amazon Web Services (AWS), ZKBio Time Cloud eliminates the need for a dedicated on-premises server.

This simplifies setup by removing the database configuration process, allowing for easier administration through subscription.

Mobile Attendance Solution

Mobile Punch In and Punch Out for Time Attendance Records

User simply turn on the application on smart devices (iOS / Android). Click the punch-in button, the clock-in / out and attendance will be recorded.

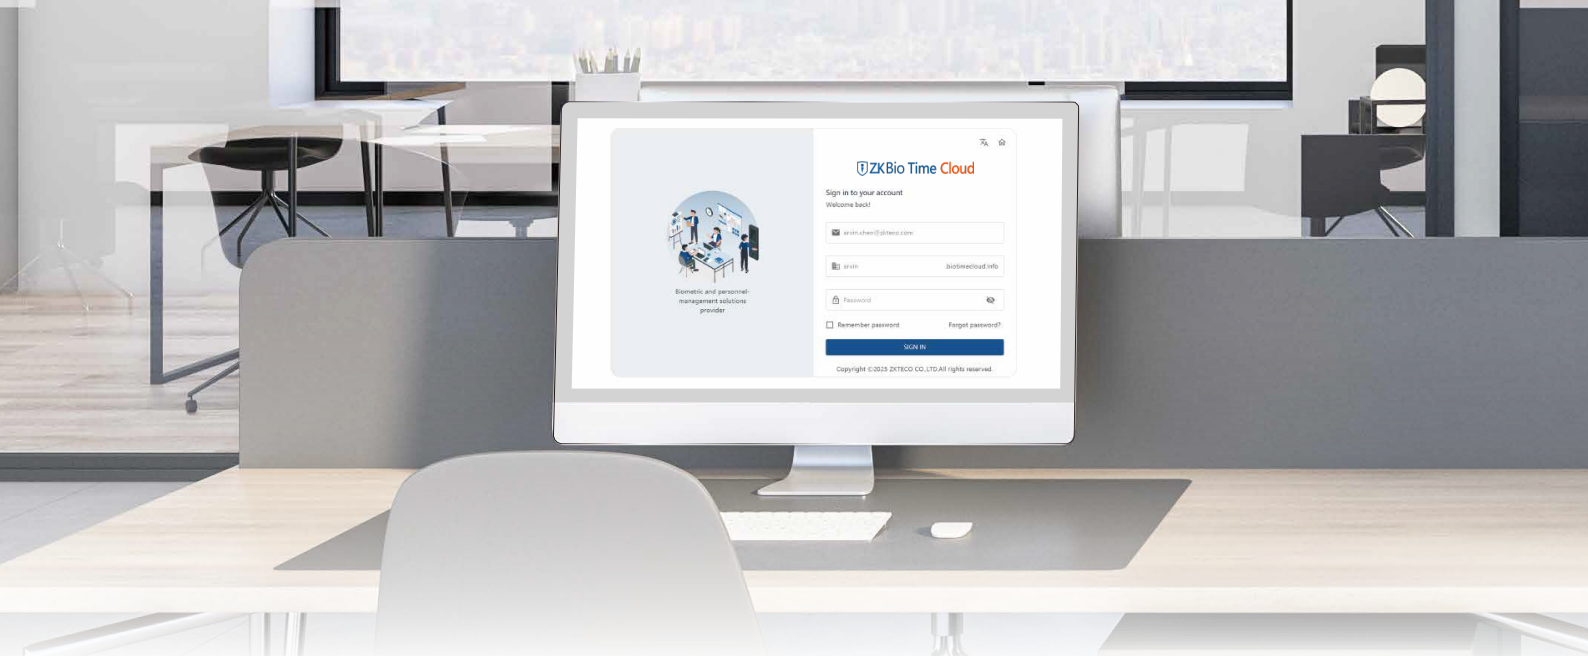

Leave Request & Employee Personal Check

With the mobile app, users may apply for leaves or field duties instantly in any mobile device, which provides quick and easy approvals without complicated and time-consuming procedures. Users can view their annual leave and sick leave in leave balance via the ZKBio Time Cloud APP.

GPS Tracking - Reporting to administrators

With the mobile app, the position of staff can be precisely obtained through position reporting.

Cloud-Based Time and Attendance Platform

Cloud-Based Time & Attendance Platform

Users can access the cloud system anywhere with their cloud-based browser to remotely manage thousands of PC & smart devices under the complex network (WLAN).

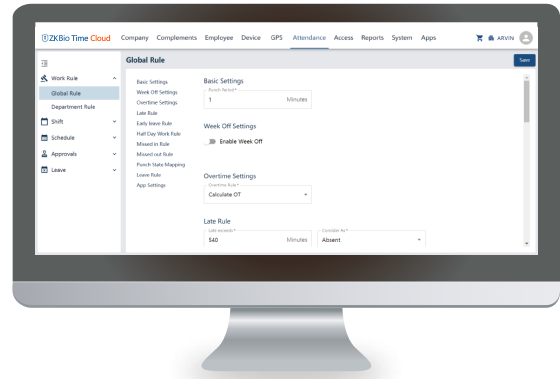

Seamless Integration of Ralvie AI

ZKBio Time Cloud's integration with the Ralvie AI cloud platform enables comprehensive workforce management capabilities through automated time-tracking and project management functionality. This seamless integration streamlines time-tracking and project workflows, making it easier for teams to collaborate effectively. HR teams benefit from automated data handling that reduces their daily workload, while managers gain valuable insights through clear performance reports and analytics that help drive better business decisions.

Global Rule & Local Rule Integration

ZKBio Time Cloud is a powerful time & attendance software which can set up various attendance rules that are applicable for the whole company, individual departments, individual attendance group. Users can set the attendance parameters like check-in, check out, overtime rules, rule for non-scheduled days.

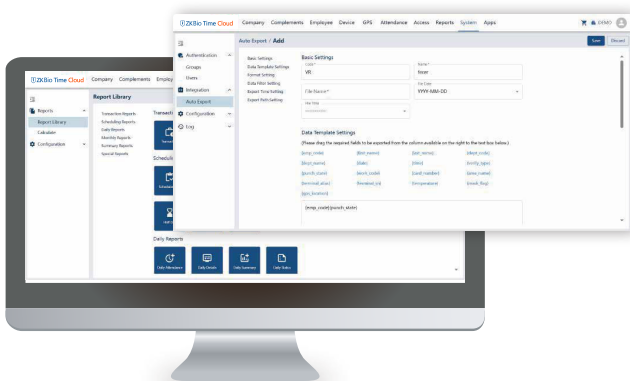

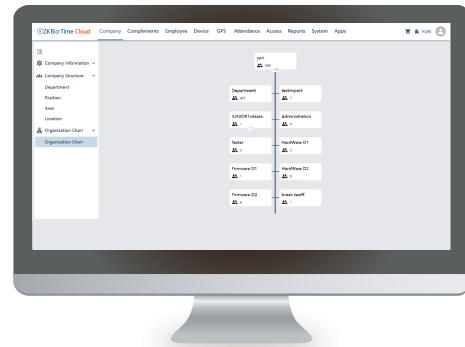

Multi-Level Approvals and Automatic E-mail Alerts

Leave, manual punches, overtime, schedule adjustment and other events can be applied through ZKBio Time Cloud platform, which will then be approved by multi-level approvers who are set by hierarchal level.

E-mail notifications regarding the application will be sent to the relevant approving authority.

Clear Organizational Structure

ZKBio Time Cloud offers an organizational chart to visualize your company's employees according to the required configuration. You will be able to view the employee's hierarchy, job position, department to which they belong, and their subordinates.

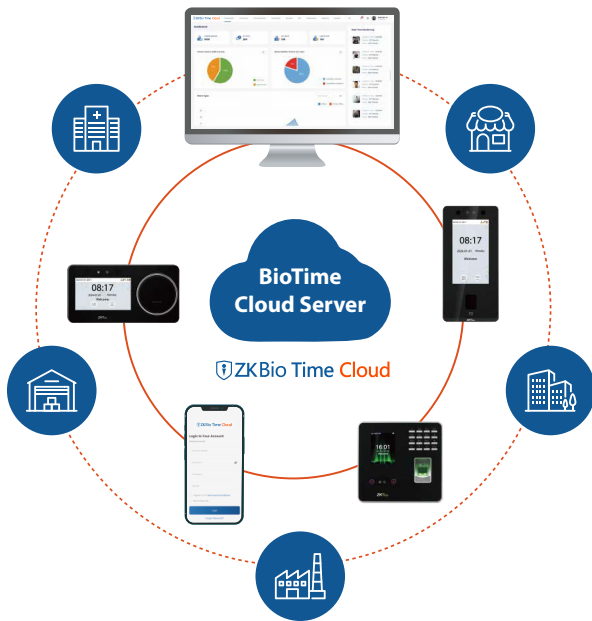

Attendance Report and Calculation

ZKBio Time Cloud possesses 30+ standard reports, which are applicable to any enterprise / organization regardless of its scale or industry. These reports can be exported in formats such as PDF, TXT, CSV and XLS. The administrator is allowed to select the order of columns and the total number of items to be displayed on the screen.

In addition, ZKBio Time Cloud also includes an integrated report, enabling users to create their own customized reports based on specific requirements.

Access Control

It can achieve simple access control functions. With the access module we can configure door opening rules, so anyone who has this privilege activated can activate the biometric device relay and enter a specific door.

High-Level Security - AWS Cloud Storage

Powered by Amazon Web Services (AWS), ZKBio Time Cloud ensures that all its data is protected by AWS cyber security protocols, and all its communications are encrypted by TLS 1.2. It ensures the availability and confidentiality of its data and provides end-to-end privacy and security.

Full Overview Dashboard

- Real-time Data Dashboard
Provides administrators with real-time monitoring, including employee check-in / out, attendance analysis, work type distribution, and leave tracking, enabling efficient management and deep insights.
