3. Device Installation

Install on the wall

- ① Attach the mounting template sticker to the wall, and drill holes according to the mounting paper.
- ② Fix the backplate on the wall with the wall mounting screws.
- ③ After passing the wires through the wiring hole and connecting them to the device, and then snap the device onto the backplate and push it down into place.
- ④ Fasten the device to the backplate with a security screw.

4. Power Connection

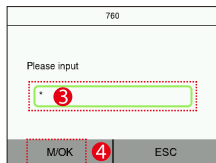

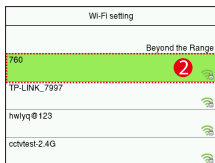

- Recommended AC adapter: **5V, 2A**
- To share power with other devices, use an AC adapter with higher current ratings.

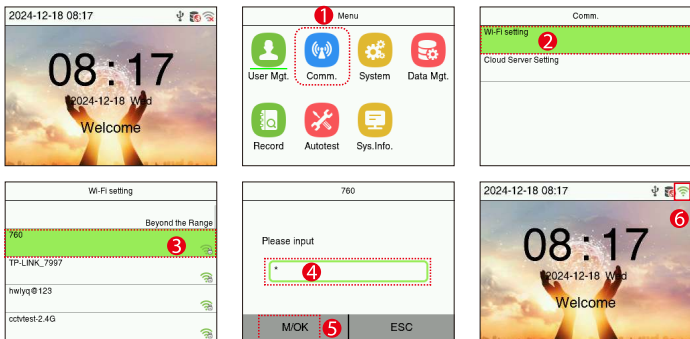

5. Wi-Fi Connection

After powering up the device, it enters the Wi-Fi setting shortcut interface. Pressing **M/OK** in this interface will directly enter the Wi-Fi setting interface.

The device will search for available Wi-Fi within the network range, after selecting the available Wi-Fi from the list, you will enter the password interface, enter the password and press **M/OK** to connect. After the Wi-Fi connection is successful, the Wi-Fi  logo will be displayed on the status bar.

If the device is already bound, pressing **M/OK** will take you directly to the Main Menu screen. Then click **Comm. > Wi-Fi setting** in the menu to configure Wi-Fi for the device. The device will search for available Wi-Fi within the network range, after selecting the available Wi-Fi from the list, you will enter the password interface, enter the password and press **M/OK** to connect. After the Wi-Fi connection is successful, the Wi-Fi  logo will be displayed on the status bar.

Note: If you are still in the QR code interface after binding the device, the QR code will disappear after Wi-Fi is configured.

6. Add Device

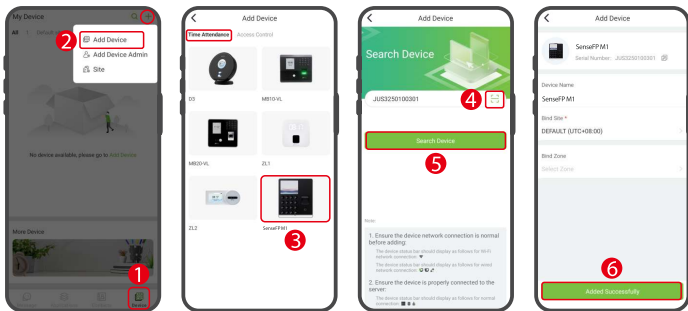

Support for adding devices in the ZKBio Zlink App and software.

Note: Due to the continuous updating of the App and software version, the interface of this manual is for reference only, please refer to the actual interface of the App and software.

Method 1: Add a device to the ZKBio Zlink App

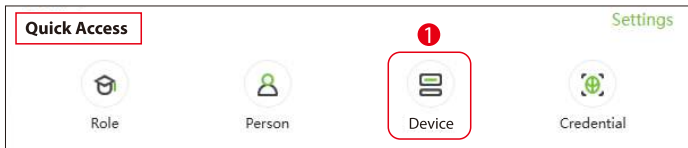

1. Access the ZKBio Zlink App and click on **[Device] > + icon > [Add Device] > [Time Attendance] > [SenseFPM1]**.
2. Click  icon to scan the QR code on the device. The serial number of the device will be displayed in the bar. Then click **[Search Device]**.

3. Enter the device name and specify the device to a site and zone. Click **[Added Successfully]** to complete the addition. At the same time, the device voice prompts “Device is added successfully” indicating that the addition is complete.
4. Once successfully added, the device is displayed in the list of the device interface.

Method 2: Add a device to the ZKBio Zlink Web

1. Click **[Device]** in column Quick Access on the home page to enter the device setting interface.
2. Then click **[Add Device]** to enter the Add Device interface.
3. In the Add Device pop-up window on the right, enter the Serial Number and click **[Search]** (make sure the device Wi-Fi is connected).
4. Then enter the device name and specify the device to a site. Select Site from the drop-down menu. Click **[Save]** to complete the addition.
5. If the device is successfully added, it will be displayed in the device list of the device management interface (Note that there is a short delay in the device, wait a few moments or refresh the device status from 'Offline' to 'Online' status).
